A New Firm Name

INLAND STEEL PRODUCTS COMPANY

Formerly

MILCOR STEEL COMPANY

New in Name Only, for you will continue to see the same familiar "Milcor" trade mark on the products of our company.

You will continue to deal with the same people who offer the same friendly Milcor service at the same addresses.

The name Milcor Steel Company has been changed for two reasons:

1. Milcor is not and never has been a steel maker as the old name might have implied. The new name more accurately describes our business as a sheet metal fabricator.
2. Since 1936 we* have been a subsidiary of Inland Steel Company. The new name merely gives formal expression to this relationship of more than ten years standing.

Next to the product itself and the service it will render, you are naturally most interested in how, where, and by whom it is made. The permanency and stability of the manufacturer — backed by modern facilities in plant equipment, buying power, methods of manufacture, and distribution — have a direct bearing on the success of your own business.

From the standpoint of what it means to you as a customer, we have endeavored to produce the very finest in steel products. Milcor will continue to provide constant improvement in products and service under its new name, Inland Steel Products Company. The Milcor trade mark on the material you purchase from Inland Steel Products Company will stand for the same high quality and outstanding value which has built its business over the years.

**Remember, NOTHING IS CHANGED
BUT THE COMPANY NAME.**

Conductor Pipe, made in three styles, is precisely straight. Milcor's intricate machines shape the pipe and seam it under pressure in one operation. The seam forms a strong, watertight joint.

Milcor Conductor Pipe is now made with an improved Crimp-end which facilitates the application of elbows and fittings.

TWO-DRAIN CHANNEL ROOFING

with
PERFECT LAP

TWO DRAIN
CHANNEL DETAIL

The design of Two-Drain Channel Roofing is such that the lap is actually tightened as the roof expands and contracts due to temperature changes.

The "PERFECT LAP" makes a tight lap at the end of the sheets as soon as it is applied to the roof.

MILCOR NON-SYPHONING 1 1/4-INCH CORRUGATED ROOFING

The Non-Syphoning
Features Prevent
Leakage at
Side Laps

The Non-Syphoning feature is built into this roofing by the sharp break made in one of the lower corrugations of the side lap. This break produces an air space which offsets syphoning.

Any seepage that may occur from a driving rain, or from the corrugations being banked with snow, is carried away by the small gutter formed by the break. The capacity of the gutter is much greater than is necessary to carry all the water that may be driven over or through the corrugation.

CORRUGATED ELEVATOR SIDING

1 1/4" — 2 1/2" Corrugated

Sheets are laid in such a manner that the elevator sides have a chance to settle without disturbing the fastenings of sheets. Our

2 1/2 inch Corrugated Sheets are 26 inches wide by 32 inches long, and cover 24 inches. 1 1/4 inch Corrugated Sheets are 26 inches wide by 32 inches long and cover 24 inches. The sheets are laid with a 2 inch end lap and the

nails are two inches above the upper edge of the lower sheets, thus allowing the sheets to slip 2 inches in every 32 inches as the sides of the elevator settle and will not buckle or draw the nails.

MILCOR METAL BARN BATTENS

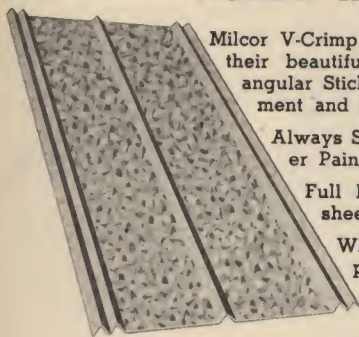

The use of these metal batten strips is an economical and practical method of weatherproofing barns, sheds and other buildings on which the outside boarding is applied vertically. Outer edges turn down and when nailed are held tightly against the boards. Center bead fits into the crack forming an impenetrable bond with the siding. Made of galvanized steel in 8 and 10 ft. lengths. Crated 1,000 ft. to crate. Rail rate of freight allowed on quantities of 1,000 ft. or more.

Price per 1,000 Ft. \$31.20

V-CRIMP ROOFING

For first course, mallet down side V-Crimp about 1¼ inches. Turn edge over sheathing at gable end and nail with ¾ inch roofing nails every 2 to 3 inches. Let lower end of sheet project 1½ inches at eaves and slip wood strip under V-Crimp until lower end is flush with eaves. Snip sheets, turn down over edge, and nail.

When first sheet is in place, nail under end lock flange to sheathing. Hook end lock flange to sheathing. Hook end lock flanges together, mallet down and follow up roof to ridge.

In laying next course, overlap V-Crimp of sheets, nail through V-Crimp and wood stick with 1¼ inch roofing nails every 8 to 12 inches.

Drive nails on slant through side of V-Crimp, not through crown.

RIDGE ROLL FOR 5-V ROOFING

Note apron is embossed with 5-V design. Made in two pieces—adjustable to roof pitch.

Made in 26 inch lengths of Milcor Galvanized Steel.

ROOFING NAILS

IDEAL FOR CORRUGATED ROOFING

① ZINCLAD CALK SCREW NAILS

1. A Spiral Shank which provides better holding power and will not pull out. One-piece design.
2. A Leakproof Head which plugs the hole and cannot loosen or come off.
3. A Heavy Zinc Coating which protects the nail itself and also assists in preventing rust on the roofing around the nail holes.

ORDER WITH YOUR ROOFING.

1/2-INCH HEADS

Packed 100 lbs. to a Keg or twenty 5-lb. cartons to a case.
Requires approximately 1 lb. to square of Roofing.

Size	Nails Per Lb.	100 Lbs. or More	Less Than 100 Lbs.
1 1/2"-----	120	\$0.36 lb.	\$0.38 lb.
1 3/4"-----	105	.36 lb.	.38 lb.
2"-----	90	.36 lb.	.38 lb.
2 1/2"-----	74	.36 lb.	.38 lb.

② ANCHOR SHANK LEAD-HEAD NAILS

"Anchor" nails not only keep the roofing tight, but also, because of their soft lead heads, permanently seal and plug the nail-hole against moisture and leaks. The body of this nail carries a series of raised, anchor-like rings which imbed themselves in the wood. These anchors prevent any pull or twist after the nail has been driven. Tests prove that "Anchor" nails hold FOUR times better than ordinary nails.

Packed in 50 lb. cartons.

Requires approximately 1 lb. to square of Roofing.

Size	Nails Per Lb.	100 Lbs. or More	Less Than 100 Lbs.
1 1/2"-----	108	\$0.37 lb.	\$0.39 lb.
1 3/4"-----	100	.37 lb.	.39 lb.
2"-----	94	.37 lb.	.39 lb.
2 1/2"-----	70	.37 lb.	.39 lb.

For Galvanized Nails add \$0.03 lb.

③ LEAD-HEADED ROOFING NAILS

Requires approximately 1 1/2 lbs. per square of Roofing.

Size	Nails Per Lb.	100 Lbs. or More	Less Than 100 Lbs.
1 1/2"-----	97	\$0.35 lb.	\$0.37 lb.
1 3/4"-----	90	.35 lb.	.37 lb.
2"-----	83	.35 lb.	.37 lb.
2 1/2"-----	70	.35 lb.	.37 lb.

④ LEAD-HEADED FASTENERS

Size	6"	7"	8"	9"	10"	11"	12"	13"	14"
No. Per Lb.	25	23	21	20	18	16	15	14	12
Less than 100 lbs.	\$0.47 lb.								
More than 100 lbs.	.45 lb.								

⑤ PATTERSON ROOFING CLIPS

Packed 250-500-1,000 Per Box.....\$52.00 Per M
Saves labor costs in fastening roofing or siding to steel structures.
Can be fastened to practically any size of structural steel shape.

CASINGS AND ACCESSORIES

These casings are designed for application before plastering. When the plastering is completed, the casings are integral with the wall and provide an air-tight junction between themselves and the jamb. The expanded metal wing feature of Nos. 4, 6, 60 and 66 provides a secure bond and key for the plaster around doors, windows and other wall openings and prevents cleavage cracks and pulling away from the wall.

All styles of casings are straight and uniform, affording perfect miters at corners and a neat, invisible union with the plaster surfaces. Furnished in 7, 8 and 10 ft. lengths. Packed in approximately 500 ft. lots.

H & C BASEBOARD REGISTERS

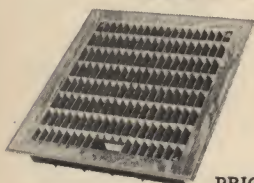

NO. 130 SERIES
With Removable Face

No. 130 Series Registers, with removable face, are outstanding because of their distinctive appearance combined with large free area and low resistance. Flexible horizontal fins provide exceptional concealment of duct. Finest workmanship is reflected in every detail.

PRICES EACH — NO. 130

Stackhead Opening	10 x 8	12 x 8	12 x 9	13 x 11
Proj. from Wall at Base...	2 1/4"	2 1/4"	3 1/4"	5 7/8"
Free Area, Sq. In.	63	78	88	118
Metalustre Finish	\$3.00	\$3.60	\$4.50	\$7.88

H & C FLOOR REGISTERS

NO. 210 "NO-FLEX"

No. 210, with mesh openings $\frac{1}{16} \times \frac{1}{16}$ ". Free area averages 70%. Construction exceptionally rigid. Face removable from body. Screws are recessed below level of face. Very popular in Medium Dark Oak Finish. Class number of face only to fit body is No. 218.

PRICES EACH — NO. 210

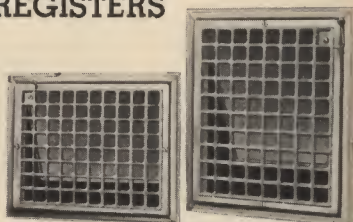

Opening Size	8 x 10	9 x 12	10 x 12	12 x 14	14 x 16

Oak	2.78	3.52	3.90	6.82	10.80

H & C SIDEWALL REGISTERS

NO. 330

The face of this register is of the flexible fin type, matching in design No. 130 Series Baseboard Register. Free area of above registers is so great that sizes larger than 12 x 8 are not necessary.

NO. 345

No. 345 is a reversible Sidewall Register. The same register may be installed in either a horizontal or vertical setting by simply removing two of the four screws which attach the valve to the stackhead flange.

PRICES EACH — NO. 330

Opening Size ...	10 x 8	12 x 8

MILCOR TWO BURNER BAKE OVEN

A large spacious oven, the No. 22 will accommodate six loaves of bread or a large roast. Sides and top are one-piece for strength and rigidity. The steel liner is firmly secured — cannot come loose. Large horizontal glass windows afford an excellent view of oven interior. New type grills can't fall out, but may be quickly removed for cleaning and easily replaced. Cross ribs run from back to front, making it easy to slide pans and dishes in and out of the oven.

Outside dimensions: 16" high; 19 $\frac{3}{16}$ " wide; 12 $\frac{3}{4}$ " deep.
Inside dimensions: 15 $\frac{3}{16}$ " high; 17 $\frac{7}{8}$ " wide; 12 $\frac{3}{16}$ " deep.
Grills are 9" deep. No. 22 — PRICE EACH \$7.30.

F. O. B. Baltimore, Md.; Buffalo, N. Y.; Cincinnati, Ohio; Cleveland, Ohio; Detroit, Mich.; Kansas City, Mo., or Rochester, N. Y.

MILCOR SINGLE BURNER BAKE OVEN

Every quality feature of the larger Milcor oven is duplicated in the No. 111. Sides, top and back are lined with asbestos. The door casing is recessed, and an air space provided between the inner and outer panels of the door to keep in the heat. A built-in thermostat shows oven temperature. The flame spreader runs from side to side for more even heat distribution.

Roomy enough for four loaves of bread or a small roast. Made of Milcor Blue Finish Steel for durability and lasting satisfaction.

Outside dimensions: 11 $\frac{9}{16}$ " high; 12" wide; 11 $\frac{1}{2}$ " deep.
Inside dimensions: 10 $\frac{3}{16}$ " high; 10 $\frac{9}{16}$ " wide; 11 $\frac{3}{16}$ " deep.
Grills are 8" deep. No. 111 — PRICE EACH \$3.80.

MILCOR VENTILATORS

HAZEL REVOLVING VENTILATOR

One-piece body construction provides a double thickness of metal at vane or top wing. Central balance of ventilator reduces rotating resistance to a minimum. Offset holes in bracket keep pivot pin clean automatically, preventing hood from sticking.

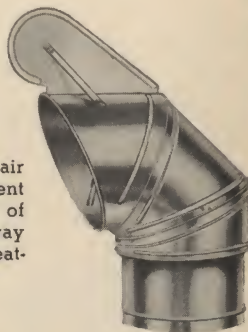

MILCOR SPINNER VENTILATOR

The slightest breeze keeps this ventilator operating efficiently. Construction makes down draft an impossibility. The shaft holding the revolving blades turns on ball bearings which run in a bath of oil.

NU-ALPINA VENTILATOR

Utilizes wind currents to draw foul air from buildings. The slightest movement of air striking the vane at the top of the ventilator swings the opening away from the wind. The vacuum thus created forcibly draws out the foul air.

PRICES EACH

MILCOR RURAL MAIL BOXES

Milcor mail boxes have been approved by the Postmaster General. Made of galvanized steel and coated with aluminum paint they are neat and finished in appearance and thoroughly weather-proof. Smooth, rounded corners and edges facilitate use by the carrier and owner, protect the mail. A corrugated drain in the bottom carries away moisture which would otherwise accumulate in the box.

NO. 2 MAIL BOX

Note heavy piano hinge on door. Strong snap bars hold door securely in place. The signal device works easily and the flag is coated on both sides with weather-proof red enamel.

Inside measurements: $23\frac{3}{16}$ " long, 11" wide and $13\frac{3}{8}$ " high. Shipping weight, approx. 20 lbs. each, packed one to a carton.

Now available. Price — \$6.80 each.

F. O. B. Baltimore, Md.; Buffalo, N. Y.; Cleveland, Ohio; Cincinnati, Ohio; Detroit, Mich.; Kansas City, Mo., and Rochester, N. Y.

Easy to Load and Unload

Leaves and grass cuttings can be raked in without stooping. Heavier loads can be pushed or rolled in without strain from lifting. The Pick-Up Cart holds a big load of anything, balances perfectly, wheels smoothly and solidly.

A Hot Item for a Cool Profit!

**A New
Space Heater
which beats
anything
you've ever seen**

- on price!
- on safety!
- on operating efficiency!

AGA Approved on All Models

INLAND *Comforteer* **GAS HEATER**

Nationally advertised to your customers

*There's a model engineered for efficiency
with each type of gas:*

- Natural gas
- Mixed gas
- Manufactured gas
- Bottled gas

It saves your customers money! It eliminates fire hazard! It provides quick, uniform, portable heat! Those are reasons the nationally-advertised Inland COMFORTEER keeps you up front in competitive selling.

The Inland COMFORTEER draws cold air from the floor level, heats it, and circulates it even to the farthest corner.

There is no complicated installation—no chimneys to build, no ducts to install. There are no service calls to adjust the burner; each model leaves the factory all set for your type of gas:

- Model (Unvented) 125A — Natural gas (1135 BTU per cu. ft.)
- Model (Unvented) 125B — Manufactured gas (535 BTU per cu. ft.)
- Model (Unvented) 125C — Mixed gas (800 BTU per cu. ft.)
- Model (Unvented) 125D — Bottled gas (Propane & Butane)

Price, all Models, \$21.00

AGA
Approved

Made by the Inland Steel Container Co., a big, long established firm with a reputation for quality.

Units shown below are assembled to complete Comforteer heater.

Specifications

"COMFORTEER" SPACE HEATER

- Model 125A — Natural (1135 BTU per cu. ft.) gas.
- Model 125B — Manufactured (535 BTU per cu. ft.) gas.
- Model 125C — Mixed (800 BTU per cu. ft.) gas.
- Model 125D — Liquified Petroleum (Butane & Propane) gases.

TYPE: Unvented, direct type circulator with an interior baffle for safety and even heat distribution.

INPUT RATING: 25,000 BTU per hour.

VALVE: A brass gas valve is included which is equipped with a fixed orifice cap for the type gas specified.

GAS CONNECTION: Standard $\frac{3}{8}$ " male pipe thread.

BURNER: Single piece cast iron burner and mixing venturi, slotted type, raised port burner. Air shutter is accessible from outside the heater.

MATERIAL: All steel construction. All cabinet parts and baffles, 20 gauge; bottom shield, 22 gauge; brackets, 18 gauge.

CONSTRUCTION: Cabinet and baffle of spot-welded construction. Seven standard stove bolts securely fasten the burner and baffle assemblies in place.

FINISH: All metal parts are chemically treated prior to applying the baked-on finish. Cabinet is finished in a neutral brown with a smooth, hard, chip-proof surface; bottom shield is painted aluminum, interior baffles are finished with an odorless high temperature black paint.

DIMENSIONS: Heater, 13 $\frac{1}{4}$ " deep, 20" wide, 18" high.

WEIGHT: Shipping weight — 33 pounds, packed one to a carton.

Order the Inland COMFORTEER for your store now. Benefit by the sales advantages it gives you: low price, extra safety, superior operating efficiency. Order by model number. All styles beautifully finished with neutral brown baked enamel.

Price, all Models, \$21.00
